

STYLINER[®] *Mark 3*

SYSTEM FEATURES

- 3" x 2" and 4" x 4" marking fields
- Quality tested and proven durability
- Variety of Stylus assemblies available to best fit your application
- Marks on almost any solid surface
- Mark flat, curved, convex, concave, irregular and delicate surfaces
- No special tooling or fixtures needed to mark most part geometries
- Choose from several controller options and two operating software packages, plus 2D Data Matrix capability
- 30-month standard warranty
- Technical support 24 hours, 7 days a week

STYLINER[®] Mark3 has a wide range of capabilities and software that is easy to program. The STYLINER[®] marking head is extremely precise, durable and virtually maintenance free. All this makes marking your parts simpler, and saves production time and expense.

Meets ISO Traceability Requirements...

STYLINER[®] Mark3 can apply permanent date codes, sequential serial numbers, and manufacturing place-of-origin identification marks on your parts, sub-assemblies and finished products in accordance with ISO certification guidelines.

Integrated Shuttle Feed

Mark3 column-mounted marking system suitable for workbench, table top or shop cart, and comes complete with controller and operator interface software. It is also available as either a 2" x 3"-S head for in-line integration, or 2" x 3"-P portable marking head for marking parts too large or heavy to move to a stationary machine.

MARKING SYSTEM

Electrical Service:	110VAC	Actuation:	Keyboard, custom signal or foot switch
Pneumatic Service:	85 PSI, 2-3 SCFM average	Character Height:	Variable from .040" to marking field limit
Dimensions:	12"W x 16.5"D x 28"H	Marking Depth:	Variable from .001" to .020" depending on metal
Shipping Weight:	60 lbs.	Marking Speed:	6 characters per second
Die Space:	8"	Warranty:	30 months on parts and workmanship
Working Field:	3" x 2" and 4" x 4"		
Stylus Types:	Vary by application		
Stylus Z-Axis:	Manual crank		

SOFTWARE FEATURES

- Style40 and StyleWrite for windows operating system
- Variable speed, character size and marking depth
- Five standard fonts
- Import AutoCad images
Scale, rotate and position as required
- Creates bar codes, automatic date/time stamping
- Allows true radial marking
- Infinite ascending/descending increments for serial marking
- Works with most data interfaces: data files, serial ports, multiple routine and variable search tables, vision reading systems
- Full password security for up to 16 users
- Save different part numbers in files for quick recall and for ISO traceability

OPTIONS

- Nameplate shuttle feed
- Nameplate holding clamp
- Custom parts fixture
- High-speed and extended throw stylus
- Rotary fixture
- Additional fonts
- Bar code scanner
- 2D Data Matrix software
- Custom software interface
